Tool Regionalisation

Wednesday, 3 March 2010 09:30 (30 minutes)

There seems to be a reduced interest for deployment of operational tools at a national level. Given the limited support for this activity within EGI-InSPIRE is a better alternative too have regional/national views of centrally support tools. How should this be reflected in the planned EGI-InSPIRE work.

If this is not desired - where will the effort come from to develop and support these deployed instances?

Presenter: FERRARI, Tiziana

Session Classification: Site Monitoring and Tools
