Install in browser…

Request a new certificate

Congratulations, your certificate has been approved and was retrieved from the Certification Authority. To be able to access web-based services, you will finally want to install it into your webbrowser, *Mozilla Firefox* ([change browser](#)).

Please follow these steps:

1. Please enter the private key password that you have given before.
   Password: [_____]

2. Read these instructions, then press the *install in browser* button below.

3. When an *Internet Security* dialog appears, choose *Allow*.
   If you see an error dialog instead, read more here.

4. If you have set a master password, enter it in the dialog that pops up.

5. In the password dialog for the *certificate backup*, enter your private key password.

6. A message dialog will indicate if the operation succeeded.

Request a new certificate

Congratulations, your certificate has been approved and was retrieved from the Certification Authority. To be able to access web-based services, you will finally want to install it into your webbrowser, *Mozilla Firefox* ([change browser](#)).

Please follow these steps:

1. Please enter the private key password that you have given before.
   Password: `••••`

2. Read these instructions, then press the *install in browser* button below.

3. When an *Internet Security* dialog appears, choose *Allow*.
   If you see an error dialog instead, read more here.

   > Recent versions of Firefox have more strict security settings. This means that you cannot use the procedure describes here. Instead, please [export](#) your certificate to a PKCS#12 file and import that into Firefox ([read more about importing](#)).

4. If you have set a master password, enter it in the dialog that pops up.

5. In the password dialog for the *certificate backup*, enter your private key password.

6. A message dialog will indicate if the operation succeeded.

Request a new certificate

You may want to go back and finish installing your certificate. Afterwards, the following links can help you to get started using the grid:

- Install CA certificate (recommended)

- Subscribe to a virtual organisation (VOMS)
    - Grid communities hosted in The Netherlands
    - European grid communities
    - High energy physics: Alice, ATLAS, LHCb and more...
    - mail deisa-support@sara.nl for access to DEISA HPC

- Using the Grid
