EGI Accounting

Thursday, 11 April 2013 11:00 (1 hour)

Impact

This workshop will enable the developers of EGI Accounting tools to disseminate information about new versions and latest developments.

Summary

This workshop will cover recent developments in EGI Accounting, including the new APEL Client, the Regional APEL Server, the Cloud Accounting Portal and Application Accounting.

Description

New APEL Client - the implementation and functionality of the new APEL Client, which will include the facility to publish local jobs and information about MPI jobs.

The Regional APEL Server will allow NGIs to collect data from their APEL clients in a regional repository and publish to both a local portal as well as the central APEL repository.

EGI Accounting Portal - Cloud Accounting.

Application Accounting.
