Commitment statements from current TPs

Friday, 8 March 2013 12:00 (20 minutes)

Each current Technology Provider (EMI, IGE, StratusLab, PSNC, SAGA, UVACSE) will provide an commitment statement as to where in the evolved TCB ecosystem they see themselves or successors see fit to contribute in the future.

The statements will include information about:

- the level of desired commitment (community, contributing, integrated),
- the role & size of the member (small group, Product Team, Platform Integrator),
- target consumers
- type of software deployment (e.g. integrated into a specific EGI platform, individual platform)
- integration points with other platforms in the EGI ecosystem.

Further, these statements will include issues that need addressing for efficient collaboration. These issues will be the topics for discussion for the remainder of the session.

Session Classification: EGI Technology Provider ecosystem evolution
