

EGI-XSEDE integration

Tuesday, 17 September 2013 12:10 (20 minutes)

This presentation will cover the following topics:

- A discussion of support process and ticket system overviews (XSEDE uses RT) and how to integrate or coordinate tickets (help/trouble requests)
- Overview of XSEDE resource allocation and brainstorming on how we might coordinate an XSEDE-EGI-OSG allocation
- XSEDE Accounting system overview and discussion of whether there is a need to exchange accounting information
- Potential services for interfacing to compute and storage resources (UNICORE, Globus Online, GridFTP, etc.)
- Authentication overview and integration (Globus PKI for example).

Presenter: HAZLEWOOD, Victor Gene (XSEDE)

Session Classification: Operations integration
