

Workshop on Certification & Testing recommendation for Cloud standard compliance

Wednesday, 18 September 2013 11:00 (1h 30m)

Description of Work

This workshop will gather requirements and general information to work into a framework for open certification against requirements and compliance to cloud standards profiles.

This workshop is part of a series of workshops that are conducted under the auspices of the CCloudWatchHUB project.

Wider Impact of this Work

This work has been identified as part of Action 1 of the European Cloud Strategy, “Cutting through the Jungle of Standards”

Session, double-session

one session

Printable Summary

This workshop is dedicated to gather requirements for an open certification framework with which resource providers can self-certify compliance with a given set of Cloud standards, profiles on Cloud standards, and technical test suites.
