

Staged Rollout Metrics

TSA1.3

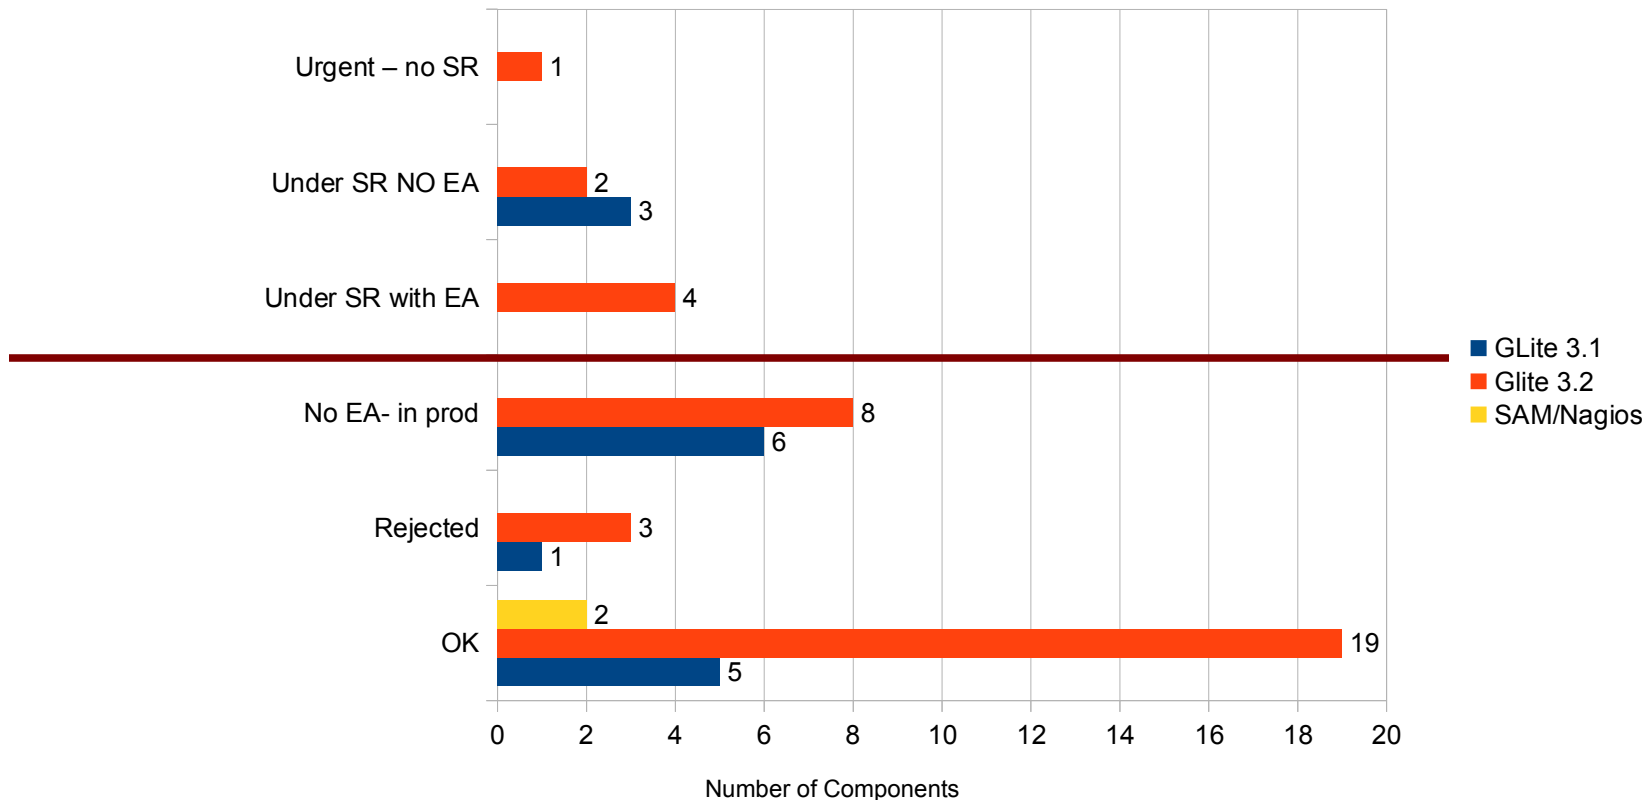

M. David

Ibergrid

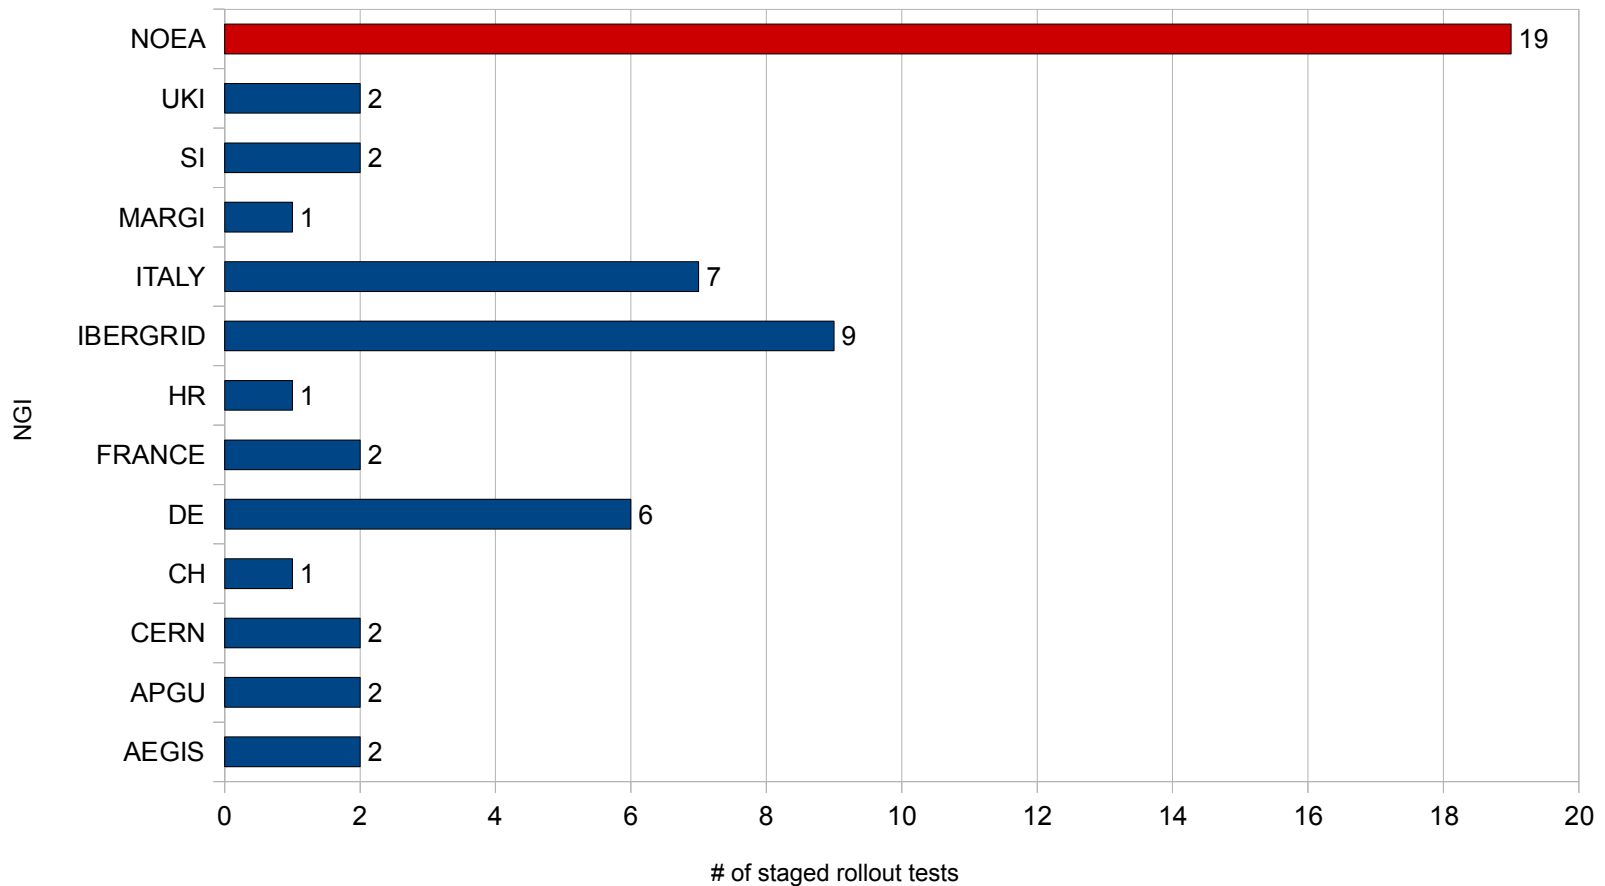

1. Period from 1st May to 20th December 2010.
2. Takes into account gLite 3.1, gLite 3.2 and Ops Tools (SAM/Nagios). It includes components which are now under staged rollout.
3. ARC, UNICORE, Globus (IGE) did not enter in the process yet.

Outcome	Comment
OK	Staged rollout OK
Rejected	Staged rollout Rejected
No EA- in prod	No staged rollout but released to prod
Under SR with EA	Under Staged rollout test
Under SR NO EA	No EA to do the test
Urgent – no SR	Urgent fix – released to prod with no SR

Glite3.1
Glite3.2
SAM/Nagios

May 1st to Dec 20

- No more foreseen releases
 - UI
 - BDII site and top
 - WN
 - VOMS mysql (oracle)
 - AMGA postgres
 - MyPROXY
 - VOBOX
 - MPI utils
 - Dcache
- At least one more foreseen release
 - LFC mysql (oracle) (in SR)
 - DPM mysql (in SR)
 - HYDRA mysql (1 foreseen release in Jan 2011)
 - Glite-CLUSTER (1 release foreseen in Jan 2011)

- Glite 3.2

- GLEXEC
- LFC oracle
- dCache
- VOMS oracle
- Glite-CLUSTER

When EMI 1.0 is released, though is one bundle, it will be composed of most of these components

A decision has been agreed within EGI (TSA1.3, SA2 and CTO) as NOT to release any component which does NOT undergo the staged rollout test
