

## Site Certification Manual Operational Documentation

Vera Hansper, Andres Aeschliman,  
Goncalo Borges, Alvaro Garcia,  
Alessandro Paolini

Current version of draft is at

<https://wiki.egi.eu/wiki/SiteCertMan>

Points of contention:

- Document links page isn't finalised yet (will be tomorrow)
- The instructions/guides for testing the operations tests need some fine tuning see
  - [https://wiki.egi.eu/wiki/SiteCertMan/GIIS\\_BDII\\_check](https://wiki.egi.eu/wiki/SiteCertMan/GIIS_BDII_check)
    - There are still references to EGEE and ROC in the BDII????
  - [https://wiki.egi.eu/wiki/SiteCertMan/Grid\\_manual\\_tests](https://wiki.egi.eu/wiki/SiteCertMan/Grid_manual_tests)
    - Needs a section for ARC tests also
- Steps 5 and 6 in the Certification section need some consideration
  - Is 2 weeks really necessary? Wouldn't it be best to have the site up as soon as tests pass?
- Do we need to consider APEL tests at the certification stage?
  - Accounting doesn't get switched on until the site is certified!

- TimeLine
  - NOC and COD read through this manual for the next month
    - Op. Docs. Team might make some small tweaks, including correcting the info as outlined above
  - Manual is presented for final approval in the Jan. OMB.
