**WS-PGRADE Portal**  
web portal of the gUSE  
https://guse.sztaki.hu/liferay-portal-6.0.5/

**Gridway**  
www.gridway.org  
- There is only one potential instance at LRZ  
- Can submit to CREAM, ARC (but outdated), GRAM-5, EMI ES  
- Will not be used by DRIHM, because  
- **Submission from SCI-BUS to Gridway is not supported** (On behalf of SCI-BUS I have to tell you that the WS-PGRADE/gUSE gateway framework currently supports the official EMI releases but does not support the use of Gridway. If this is really important for DRIHM it would require a mini-project collaboration between DRIHM and SCI-BUS to jointly develop the integration of Gridway with WS-PGRADE/gUSE)
