

- User Data Retention Policy for CPU Accounting implemented;
- Additional clients publishing using SSM 2.0/EMI 3 APEL Client;
- ARC/JURA and QCG/MAPPER accounting clients, sites now publishing in production from both of these;
- Work for Globus/Gridsafe – task with APEL team to provide updated version of AUR, currently being worked on;
- EDGI – Desktop Grid Accounting testing;
- MPI Accounting using the EMI 3 APEL client testing (by the MPI VT) verified.

- Cloud accounting work to compare data from different cloud middlewares in progress to verify data;
- The old version of the Cloud Accounting repository running SSM 1.2 has now been stopped, data has been saved;
- Only SSM 2.0 now available for publishing cloud accounting data; 8 out of the 10 sites have migrated to this version. Data is summarised and sent to the Accounting Portal.
