

Grid Operations Meeting Information

Mario David

- <https://twiki.cern.ch/twiki/bin/view/EGEE/LCGprioritiesgLite>
- Issue of LCG-CE:
 - There were several NGIs/sites that expressed concern about the support of the lcg-CE.
 - One of the main consumers of it is ATLAS:
 - ATLAS requested last week to wlcg sites to start deploy CREAMs and timelines for it.
 - The lcg-CE is not included in the Twiki above, but indirectly with the stop of support of the BDII.
 - Lcg-CE will not be released in glite 3.2 (SL5), and will not be supported in EMI.
 - David Smith is the person in charge of it! But is affected by the BDII (Laurence Field)
 - Look for alternative CE's!
 - ARC CE is based on globus, and in EMI.
 - Globus itself (IGE started in 1st Oct.)

- Deadline today for feedback about the client WNs (and other issues):
 - <https://rt.egi.eu/rt/Ticket/Display.html?id=263> : critical issues affecting gLite 3.2 deployment
 - Very few comments received.
 - Please if you want to say something raise it now....

- Next meeting:
 - 25 October 2010 14h00 CET
- Other meetings:
 - The OMB is Tuesday 26 October
 - Face 2 face SA2 meeting in Brussels (during OGF30)
