

Panel discussion

Thursday, 5 December 2013 17:30 (30 minutes)

Panellists:

- BONVIN, Alexandre
- PINTO, Salvatore
- HEIDBRINK, Hans-Ulrich
- BECKER, Bruce
- NEWHOUSE, Steven

Issues and Questions:

- a) Do the user communities present recognise the generic models that we have presented, have we missed any?
- b) As we have broken the PoC to abstract models does our resource provider see any impediments in their current operation models to any of these?
- c) Within the models that you have for the use of cloud computing what is the 'killer app' for federation?
- d) Would the user communities see added value in certification of resource provided within their this and would you be willing to have a differentiation on pricing and service type dependant on this?
- e) Would you pay for high quality reliable services and levels of support or does your community still require in the majority of FAPU services?

Session Classification: Services for the EGI Federated Cloud: use case analysis
