Security monitoring
EGI CSIRT f2f, Dec 2013

Pakiti

- Minor adaptations, operations
- Site-wide deployment at GridKa (thanks to Ursula!)
  - Cca 620 worker nodes
  - Clients reports at randomized times, window of max. 6 hours
  - Subsequent deployment
  - No problems detected on cluster or server
- Proceed with other sites and push the

Nagios

- New box deployed with current SAM installation
  - Soon in production
- Probe revision
  - Removing obsolete glite checks
- Support in certification

Results processing

- painful process, esp. recently
  - Vulnerabilities, mitigations
  - Several (different) results in Dashboard
- Meta-probe in development
  - Emir: "*I am positively sure probe will be there by then*" :-)
- The probe will produce a single result
  - Combining data from Pakiti and probes checking mitigations
