Technical Approach and Developments

Wednesday, 21 May 2014 16:30 (15 minutes)

The Pay-for-Use Pilot has tried to use existing grid and cloud technologies where possible to provide a proof of concept pilot service. There has been some extensions to existing technology and identification for future developments. This talk will describe the current pilot and desirable developments for a future production service.

Presenter: Dr GORDON, John (STFC)

Session Classification: Business development and pay per use
