

Mapping the RIs with the ENVRI Reference Model

Tuesday, 20 May 2014 14:20 (20 minutes)

All ESFRI research infrastructures, although very diverse, have some common characteristics, enabling them potentially to achieve a greater level of interoperability through the use of common standards for various functions. The objective of the ENVRI Reference Model is to develop a common framework for describing and characterising research infrastructures and their components in order to achieve seamless interoperability between the heterogeneous resources of different infrastructures.

Presenter: HARDISTY, Alex (LifeWatch)

Session Classification: ENVRI workshop
