

Supporting independence access to information from Space

Monday, 19 May 2014 17:10 (20 minutes)

This presentation will outline the importance of considering both satellite data and its transformation as a whole, where the global science community being affiliated to these data are enabled to derive “true” unbiased information. ESA, being co-founder of Helix Nebula, sees the federated infrastructure provided by “Helix Nebula – The Science cloud”, leveraging also with EGI assets, as an essential vehicle to derive the “true” information on which decisions for our future can be taken.

Presenter: LENGERT, Wolfgang (ESA)

Session Classification: Helix-Nebula workshop
