

Real World Use Cases

Wednesday, 21 May 2014 16:45 (15 minutes)

IFCA data center at the University of Cantabria in Spain installed new computing resources in 2012 oriented to promote innovation in the region.

Since then, pay per use services are offered to researchers in the academy and also in private companies.

The experience with different customers and services is described.

Presenter: MARCO DE LUCAS, Jesus (CSIC)

Session Classification: Business development and pay per use
