

GOCDB Update

David.meredith@stfc.ac.uk

25/02/2014

- GOCDv5.2 released 13th Feb
 - Includes Extension properties (custom key-value pairs on Sites, Services, SGs).
 - Some custom properties already added for charging
 - Email notification for roles
 - Refactoring / documentation
 - No issues reported yet
- EUDAT Migrated from GOCDv4 to GOCDv5.2
- New Requirement: New IPv6 address field to be added to Site and Service
 - New <IPv6Address> element added to PI output (get_site, get_service_endpoint, get_downtime etc)

- Downtime next week to update OS
 - Will test the auto failover during downtime (TBA)
- James leaving the team (leaves DM@40%)
- Prototype multiple endpoint version to be hosted on 'gocdb-test' soon.
