NGI-CH Reminder

NGI-CH is a service offered by SwiNG. It coordinates the Swiss computing sites in the Grid Configuration Database (GOCDB), i.e. Swiss sites that are embedded in the European Grid Infrastructure (EGI). It represents the sites in the bodies of the Dutch foundation EGI.eu. It ensures the needed funding for these activities. It also ensures appropriate participation in the EGI-InSPIRE project, whose Swiss leading house is SWITCH on behalf of SwiNG. The latter is regulated with a Support Agreement between ETHZ (CHIPP), UZH, SwiNG and SWITCH. NGI-CH reports and obeys the SwiNG Assembly.
