Grid Oversight, ensuring the quality of the Grid infrastructure

Overview

The ROD teams and COD form the Grid Oversight activity. By monitoring sites in their regions RODs are enhancing the quality of the Grid infrastructure that is provided to the users. Since many people will be at the User Forum, we would like to seize the opportunity to organise a 1.5 hour workshop to get in touch as COD with our ROD teams to discuss issues related to grid oversight. This is to improve the collaboration and enhance the coherency within the grid oversight activity.

Impact

Enhanced coherency of the grid oversight activity.

Description of the work

We would like to have a 1.5 hour slot to have a meeting with our ROD teams to discuss issues regarding the grid oversight activity

Conclusions

Enhanced coherency of the grid oversight activity.
