Metis Baltic - Innovation and Technology

Monday, 11 April 2011 11:00 (1h 30m)

Overview

Metis Baltic was established in Vilnius (Lithuania) in July 2010. It is part of the Metis Network, present also in Brussels (Belgium), Barcelona (Spain), Athens (Greece) and in Limassol (Cyprus).

Metis Baltic acts as:

- * Policy advisor of National R&D initiatives & programs
- * Funding Agent for technology and innovation projects
- * Project manager of complex R&D projects
- * Commercialization expert in technology and innovation
- * Intellectual property and licensing specialist of technological innovations

Metis Baltic R&D activities currently target the following sectors:

1. ICTs (mobile technologies, social networking, technology-enhanced learning)
2. Environment (water management, water desalination)
3. Energy (photovoltaic, smart grids)
4. Health care (applications in healthcare)

Metis Baltic is a full service commercialization expert providing intellectual property advisory, brokerage and licensing services.

The Metis Baltic team of experts has more than 15 years presence in this field realizing over \$ 0.5 bn from IP assets' commercialization.

The long term goal for Metis Baltic is to:

Enable Growth Market Economies to realize their desire to build high-tech, knowledge-based industries, and
Provide a meaningful commercial outlet for under-utilized technological innovations as a result of University research and/or private sector R&D activities

Session Classification: General Workshops
