

URT Meeting March 31st 2014. Minutes.

Agenda: <https://wiki.egi.eu/wiki/URT:Agenda-31-03-2014>

Participants

Christian Bernardt

Oliver Keeble

Jon Kerr Nilsen

Anders Waananen

QCD representative

Others (please excuse me, and let me know who I forgot)

UMD releases status

UMD 3.6.0 in preparation:

- For the details see
- https://wiki.egi.eu/wiki/URT:Agenda-31-03-2014#Status_of_the_products_verification.2Fstaged_rollout

Next UMD-3 releases

Next updates

- Middle May
- End of June
- October

Updates from the product teams

ARC:

- 13.11u1 version 4.1.0 RC1 under testing
- release planned for early April

dCache:

- released in AppDB a new server version 2.6.23..
- ChristianB mentioned that dCache team will start having weekly releases.
- CristinaA – hard from the point of view of UMD and SR point of view
- **Action** on Christian - will talk with developers regarding the dCache EA sites and release schedules and will come back with a summary of their discussion

DPM?LFC, FTS3, GFAL/lcg_utils:

- Details of planend updates are present in the agenda
- OliverK was interested in finding friendly sites or UI users that can play the role of EA for the DataManagement clients (GFAL/lcg_util/gfal2). Interested to see what report they should fill.

- **Action** on Cristina – send to Oliver the template of the Staged-Rollout report and follow-up with Oiver after the meeting

GridSite/CANL:

- Zdenek - notified about a new GridSite & CANL version, late for EMI Update. There are some less important bug fixes for GridSite, but one important for CANL. The bug in CANL is there since long time so could not be a urgency for the March update but would prefer having the fix at least in the next (middle May) update.

QCG:

- Ready to release version 3.2.0
- **Action** on QCG – will sent all the needed information for the provisioning in UMD of this version

WMS:

- Server v. 3.6.4 released in EMI3 Update 15

Other topics:

UMD signing packages:

- AndersW not yet convinced
- **Action** on Cristina to come back with details as soon as all the tests intended for this procedure will be finished.

Next meeting

April 14th, 15:00 CET on Adobe connect
