

# EGI Operations Portal / VAPOR

## Cyril L'Orphelin, IN2P3 Franck Michel, CNRS

5 June 2014 EGI-InSPIRE RI-261323

# Convergence Operations Portal and VAPOR

#### **Converging goals in terms of VO operations**

- Complementary monitoring views
- Dashboard of resources supporting a VO
- Improve tools to manage user communities
- Similar needs and complementary developments

#### VAPOR developed in close collaboration with Ops Portal team

- Use of Lavoisier data integration service
- Same web application framework
- Common hosting web servers

# User Community Management Operations Portal

#### **Existing tools**

- User Database based on VOMS servers
- User tracking Tool
- Robot certificate List
- VO ID cards

#### **Possible improvements**

- Extension of the capture of users on different registration systems
- API to modify VOMS/VO DB information
- Complete VO Users information
- Give a single point of access for VO users

# User Community Management Operations Portal

#### **Existing tools**

- User Database based on VOMS servers
- User tracking Tool
- Robot certificate List
- VO ID cards

#### **Possible improvements**

- Extension of the capture of users on different registration systems
- API to modify VOMS/VO DB information
- Complete VO Users information
- Give a single point of access for VO users

## User Community Management : Vapor

#### **Users database**

- Register more than just administrative data
- Apprehend the diversity of users: identify users "behind" robot certificates

#### Manager users life-cycle workflow

• Interface with LFC, VOMS, EGI Apps Db

#### Foster resource usage acknowledgment

- Track scientific production => acknowledgement
- VT Scientific Publications Repository

#### **Possible connection with Perun (Auger VO)**

5 June 2014 EGI-InSPIRE RI-261323

Infrastructure Resources : Operations Portal

#### **Existing tools**

- Resource distribution browser (GLUE 2)
- Dashboard

#### Improvements

- Extends the resource distribution browser :
  - To cloud resources
  - To give more details (OS, number of cores, capacity)
  - To replace some Gstat feature
  - Provide API
- Extends the dashboard
  - To monitor cloud infrastructures

# Infrastructure Resources : Vapor

0.3

Dec 13

#### **View of resources status**

- Detailed report of all resources supporting the VO (BDII, GOCDB)
- Monitor Running vs. Waiting jobs (queues with all jobs failed/no job)
- Available for grid resources (Glue1.3)

## Extensions for cloud resources

- Synthetic view of resources at provider
- Monitor number of VMs requested, created...
- Upgrade to Glue 2

Date

# Infrastructure Resources : Vapor

#### Monitor resources status JobMonitor

- Monitor how the infrastructure is responsive for the VO
- Success/error/time out rates
- Avg. jobs completion time

#### Extensions for cloud resources

- VmMonitor to monitor VM creation success/error/time out rates
- Avg. VM creation time
- White-list of cloud sites

# Infrastructure Resources: vapor

#### **VO Data Management**

- Catalog-based SE scan (monitor SEs feeling up, SE decommissioning, contact users...)
- Consistency issues: cleanup of dark data/lost files

# Extensions for cloud resources

- Monitor storage available for a VO at cloud sites (monitor storage feeling up, handle storage decommissioning...)
- Support other types of file catalogs?
