

European Globus Community Forum

Future Developments

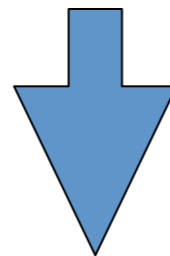

Dr. Helmut Heller

- Initiative for Globus in Europe: IGE
 - development of tools, procedures, org. bodies

- European Globus Community Forum: EGCF
 - sustainable community

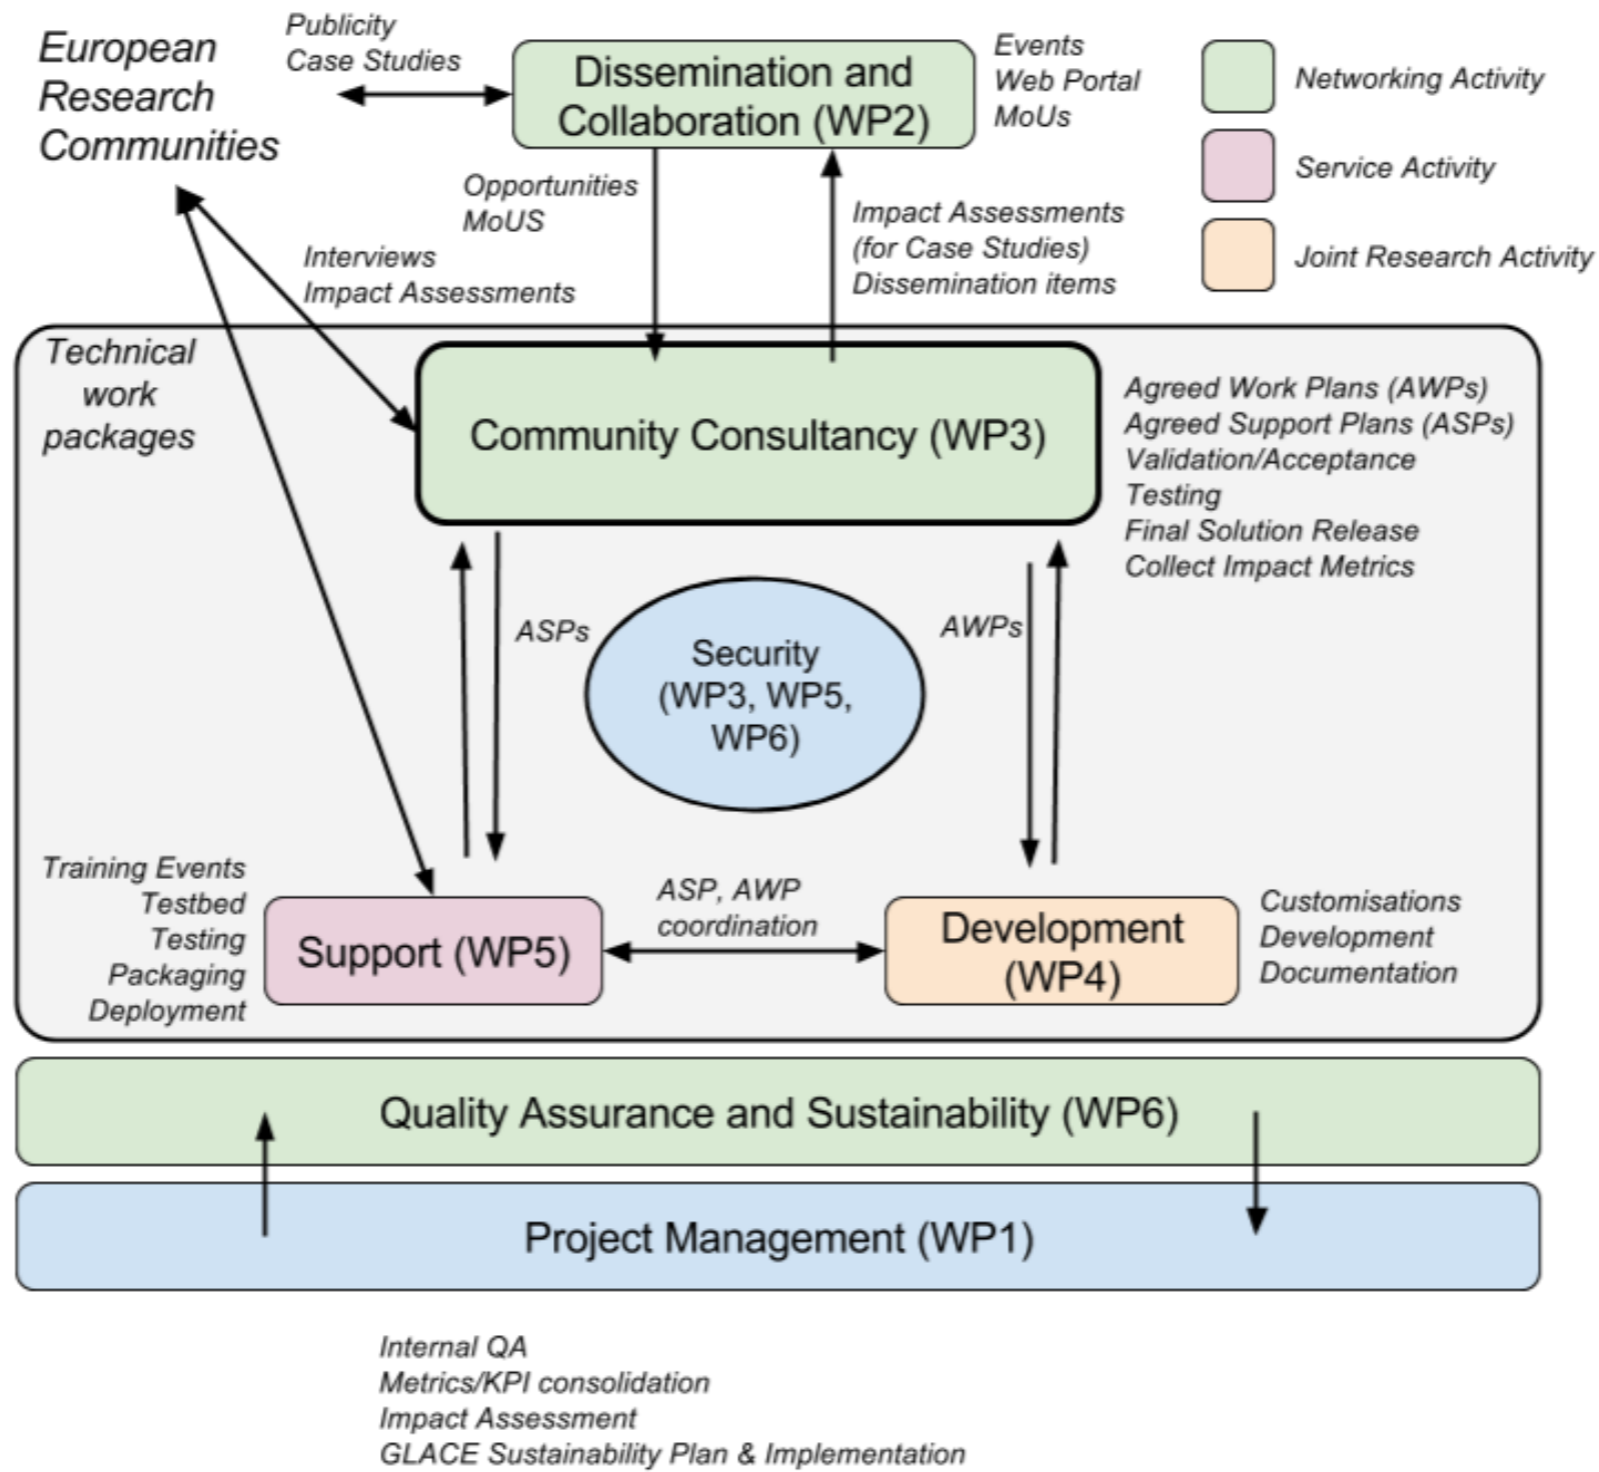

- GLobus Assistance for Communities in Europe:
GLACE

- Addresses the remaining problem:
 - lacking uptake of Grid by users
- Goal:
 - bring Grid/Globus to new communities
 - tailor the right tools for their needs
 - support and guide community
 - accompany the community start to finish
- New approach
 - consultancy

GLACE Inner Workings

Future Activities through GLACE

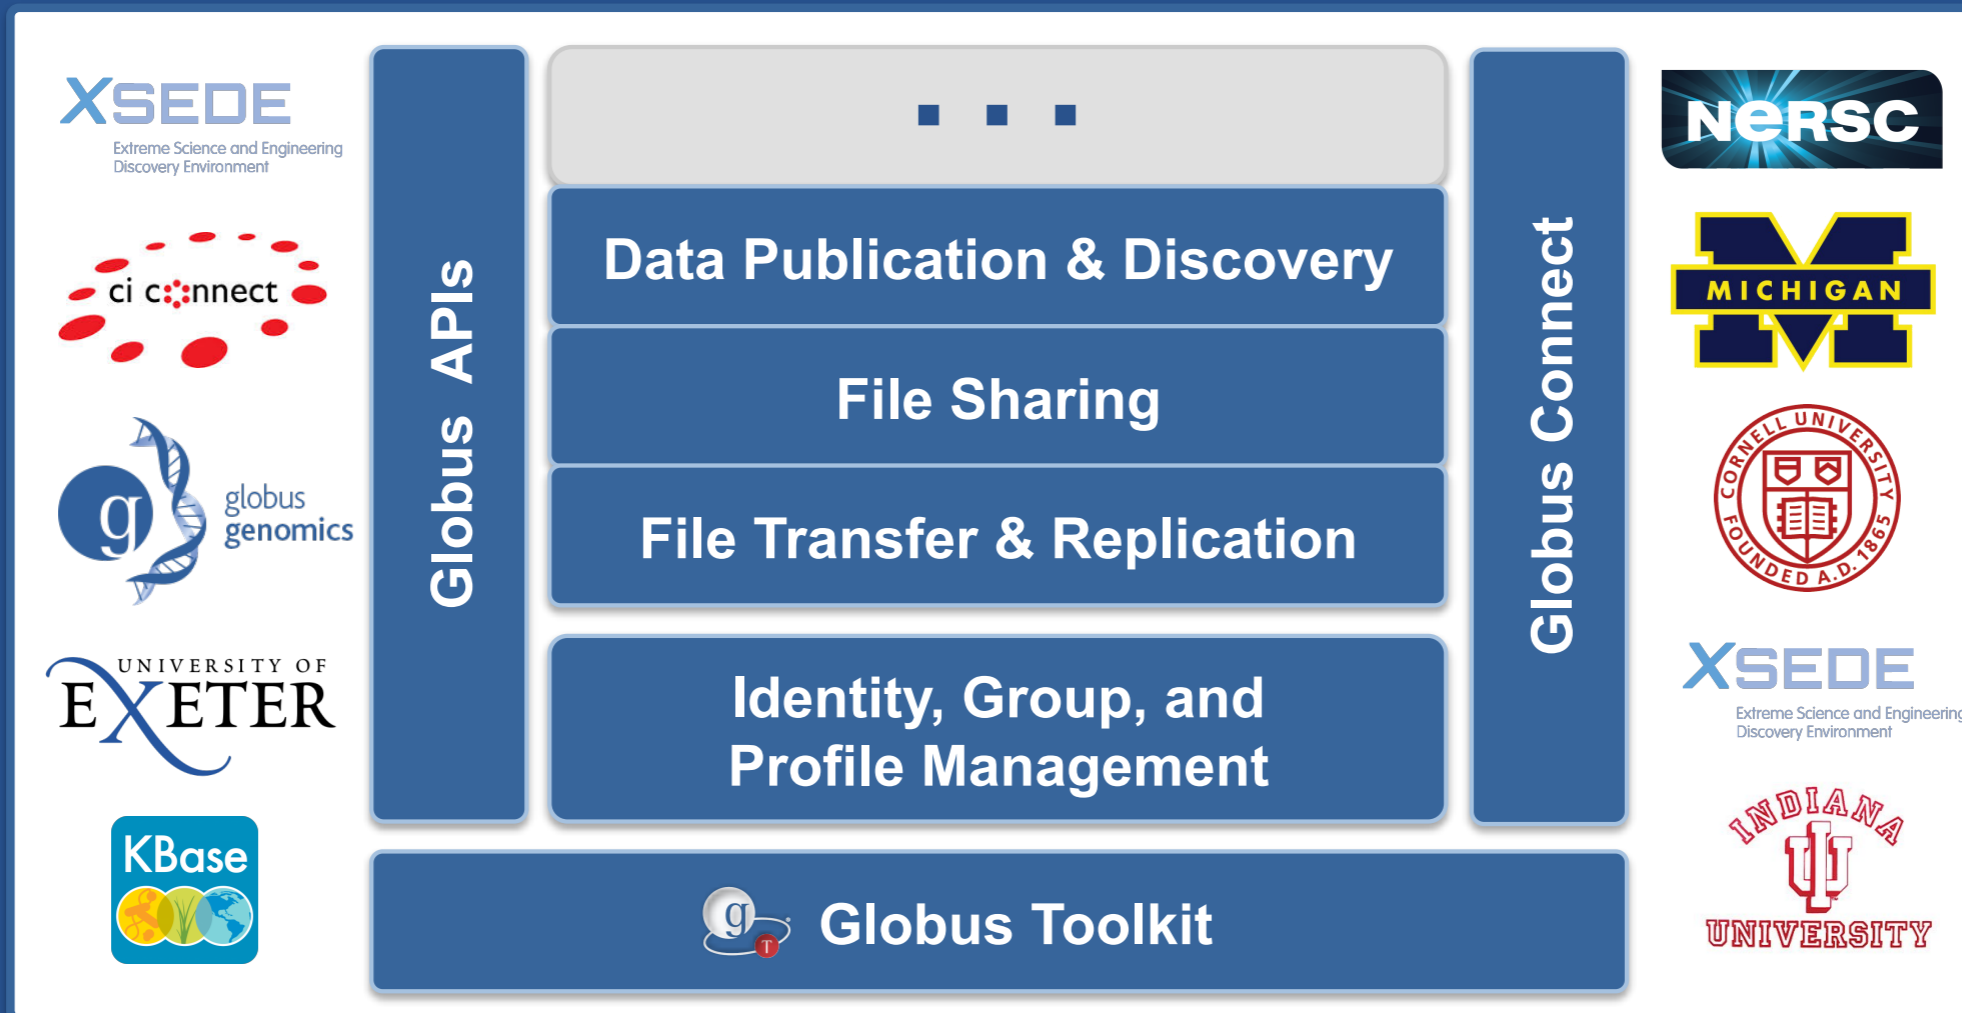

- Support existing Globus users
- Bring new users to Grid infrastructures
- Help with middleware
AND
Help with infrastructure usage
- Accompany users all the way from idea to delivery

- Focus on data: Globus Transfer
 - data sharing (through email link)
 - data publication and discovery going into production
 - Globus Online becomes Platform as a Service
 - Globus Transfer SaaS
 - Globus Genomics SaaS
 - Globus Publish SaaS
 - open for further SaaS developments on top of PaaS
- Globus appliances
- GT6 release

Globus Platform-as-a-Service

- **Technology Collaboration Board**
but also
Technology Coordination Board
 - exchange early information about future technological developments so these can be coordinated between technology providers
 - discuss at a higher level (than up to now)
 - coordinate with EGI
