– includes: gLite 3.1 and 3.2 and Operational Tools (SAM/Nagios)

May 1st to Dec 10

Ibergrid, Italy and Germany (3 NGI's) have done 60% of the total number of staged-rollout tests.

The following components in gLite 3.1 which are still supported do not have Eas

UI	NO EA
BDII site	NO EA
BDII top	NO EA
LFC mysql	NO EA
HYDRA mysql	NO EA
WN	NO EA
VOMS mysql	NO EA
AMGA postgres	NO EA
PX	NO EA
VOBOX	NO EA
MPI_Utils	NO EA

For **gLite 3.2, only the GLEXEC** component is not covered by any EA.

- Deployment: The new version of the WMS has been released a few weeks ago. **ALL sites that have a WMS are required to upgrade** to this new version which fixes the problems of interaction with the new VOMS server (gLite 3.2), among other fixes.

- Dteam VOMS server change (Dimitris)
