- End of development : february 28 th
- 2 weeks of tests
- Release Date : March 16th

`http://operations-portal.in2p3.fr/home/tasksList/
release_id/10`

- Duplicated VO entries into broadcast
- Ticket without alarm : no possibility to change the expiration date
- Vo Users Metrics - Chart Option
- Broadcast : Add a more explicit message in case of missing target
- On GGUS ticket details : ticket ID point to self page
- VO Disciplines : add the complete branch

release_id/10](http://operations-portal.in2p3.fr/home/tasksList/release_id/10)

- Study dashboard ergonomics to reduce clicks and pages redirection / Dashboard auto-refresh (1)
- Quick notepads and tickets (2)
- master alarm as a part of ticket subject using radio button (3)
- Add possibility for ROD to see the NGL related COD metrics
- Add a cc field into ticket

Our proposal is to simplify the use of the dashboard

- use modal windows (pop-up) (1) (2)
- simplify notepads and ticket (2)
- have more specific subject for the ticket (3)

- Extension of the current features and portal
- Migration or compatibility with symfony 2
- Discussion with Franck Michel
