

# Finnish Open Science and Research Initiative 2014–2017

*Tuesday, 19 May 2015 14:30 (30 minutes)*

This initiative set to increase the quality and competitiveness of Finland's research and innovation system. By increasing openness in research, we will simultaneously be improving reliability, transparency, and the impact of research. Openness also creates opportunities to participate in scientific advancement, and enables easier and more effective utilisation of research results. Promoting open science and research requires not only extensive involvement from the research community, but also cooperation and coordination, internalising new ways of working, and developments in research environments, researcher services and research infrastructures. Openness within research infrastructures will be pursued when it is legally and contractually possible.

**Presenter:** NIINIMÄKI, Sami (Ministry of Education and Culture, Finland)
