

LifeWatch solutions on IaaS

Tuesday, 19 May 2015 14:10 (20 minutes)

Within Lifewatch User community, computing needs are very wide and diverse. From single web server deployment to large computing requirements in terms of memory or CPU like model processing or knowledge base searches.

This community user is also very diverse in terms of IT knowledge. Although few cloud solutions provided for the near future are closer to PaaS, there are an IT experts user sector that need more flexible resources access in order to solve particular problems.

This presentation will show some examples of solutions proposed to Lifewatch community users as well as detected problems and the level of satisfaction from their point of view

Presenter: AGUILAR, Fernando (CSIC)

Session Classification: Federated Cloud IaaS - towards an international multi-disciplinary science cloud (<http://go.egi.eu/iaas>)
