

## “eLearning, Galaxy and ELIXIR-SI”

*Friday, 22 May 2015 10:10 (20 minutes)*

Presented will be the novel connection between e-learning platform and Galaxy bioinformatical platform into the system that (1) enables eduGain AAI authentication for the system, (2) enables end-users (scientists/researchers) that don't have (many) computer programming experience to learn how to use bioinformatical tools and find all needed tools in one place (whether downloading pre-prepared VMs or use online services) and (3) later use the same user interface for research and routine analyses and data storage on ELIXIR-SI computing platform. Computing platform and cloud data storage are supported by Slovenian NGI - SLING and NREN - Arnes.

**Presenter:** KRANJC, Jure (ARNES)

**Session Classification:** Distributed platforms for e-Learning: How can educators and scholars benefit from the Open Science Commons?
