

The EGI Federated Cloud: Status and Plans

Tuesday, 19 May 2015 11:00 (20 minutes)

The EGI Federated Cloud provides access to IaaS cloud resources on a flexible environment using common standards for computing and data access fully integrated with EGI core services. This presentation will show the available capabilities and how the federation integrates with EGI services and will also provide an overview of the coming developments.

Presenter: FERNANDEZ, Enol (EGLEU)

Session Classification: EGI federated cloud: state of the art, demos and production use cases
