

# URT Meeting May 11, 2015 - Minutes

Agenda: <https://wiki.egi.eu/wiki/URT:Agenda-11-05-2015>

[Participants](#)

[Apologies](#)

[News](#)

[UMD releases status \(Vincenzo\)](#)

[Updates from the product teams](#)

[Actions](#)

[AOB](#)

## Participants

Andrea Manzi (WLCG MW Officer)

Christian Bernardt (dCache)

Vincenzo Spinoso (INFN/EGI.eu)

Mischa Sallé (Nikhef)

Mattias Ellert

## Apologies

Tomasz Piontek (QCG)

Joao Pina (SA1/SA2)

Jon Kerr Nilsen (ARC)

## UMD releases status

- Joao: No news about SR
- Vincenzo: UMD4 to be released in September 2015.
  - Mischa: which Ubuntu version?
  - Vincenzo: Ubuntu 14 LTS

## Updates from the product teams

- Christian: dCache 2.10.28 released in AppDB.
  - Andrea: Please consider that this dCache 2.10.28 solves a leak in previous dCache releases. Sites might want to be informed.
  - Vincenzo: indeed we will address this with the next release.
- Andrea: some updates in agenda (DM).

## AOB

- Christian: can issues like the Torque one be better coordinated in the future?

- Vincenzo/Mischa: the advise is to use the SVG 2.5.13 version if a site wants 2.5, otherwise it's up to the site. Torque is not supported by EGI so there is nothing more that can easily be done on EGI side. By the way this information has been presented at OMB (Apr30) so NGIs are aware of that. A broadcast has been sent on May7 as well, with the same advise.
- Andrea: for WLCG we use the concept of "baseline" and we remark which version of Torque we use (2.5 patched).
- Next meeting **25 May 2015, 15:00 CEST** right after EGI Conference in Lisbon
  - <https://indico.egi.eu/indico/conferenceDisplay.py?confId=2534>
