

Fishery/Marine: initial requirements and market analysis

Wednesday, 11 November 2015 14:00 (30 minutes)

Initial findings of a top-down and bottom-up analysis of the Fishery and marine sciences data analysis sector will be presented. The market analysis will cover: structure and size, stakeholders and their respective interests along the data value chain. Research/industry community requirements will be collected through the recently EU co-funded BlueBRIDGE (bluebridge-vres.eu) project. The community engagement will allow for a deeper look into the fishery and marine sciences data analysis sectors to be able to build next generation e-infrastructures.

Presenter: NARDI, Nadia (Engineering Ingegneria Informatica spa)

Session Classification: Data without boundaries: market analysis and technical requirements
