## Minutes

- Several products in Verification for UMD3 and Unverified for UMD4 since some time
- Andrea: 3 sites will contribute with testing DPM on CentOS7
- Christian: dCache new release fixing security issue, released last week
  - Vincenzo: in UMD 3.13.4, which is in RC, to be tested and released in the next days
- Bartek: no relevant news, QCG working for the next UMD3 release
- Linda: please have a look at the new Strategy and Vulnerability Issue Handling Procedure <https://documents.egi.eu/secure/ShowDocument?docid=2538> ; it needs UMD Team approval; urt-discuss already cc'ed when sending the announcement about presentation for OMB approval at last OMB
  - Vincenzo will send a new email asking for comments to urt-discuss to collect feedback and spread the awareness of the importance of such document; in the near future, we foresee to make TPs sign the new TP Underpinning Agreement, especially the new cloud TPs.
- Mattias: updates in the wiki about xrootd now in EPEL stable

**Next meeting October 12, 2015 (in two weeks)**
