

User needs, tools and common policies from PARTHENOS, a E-research networking in the field of linguistic studies, humanities and cultural heritage

Tuesday, 10 November 2015 17:20 (20 minutes)

PARTHENOS (Pooling Activities, Resources and Tools for Heritage E-research Networking, Optimization and Synergies) is an European project funded within Horizon 2020, the EU Framework Programme for Research and Innovation. The project started in May 2015 and has a duration of 48 months. PARTHENOS aims at strengthening the cohesion of research in the broad sector of Linguistic Studies, Humanities, Cultural Heritage, History, Archaeology and related fields through a thematic cluster of European Research Infrastructures, integrating initiatives, e-infrastructures and other world-class infrastructures, and building bridges between different, although tightly, interrelated fields. The project will achieve this objective through the definition and support of common standards, the coordination of joint activities, the harmonization of policy definition and implementation, and the development of pooled services and of shared solutions to the same problems. PARTHENOS will address and provide common solutions to the definition and implementation of joint policies and solutions for the humanities and linguistic data lifecycle, taking into account the specific needs of the sector that require dedicated design, including provisions for cross-discipline data use and re-use, the implementation of common AAA (authentication, authorization, access) and data curation policies, including long-term preservation; quality criteria and data approval/ certification; IPR management, also addressing sensitive data and privacy issues; foresight studies about innovative methods for the humanities; standardization and interoperability; common tools for data-oriented services such as resource discovery, search services, quality assessment of metadata, annotation of sources; communication activities; and joint training activities. Built around the two ERICs of the sector, DARIAH and CLARIN, and involving all the relevant Integrating Activities projects, PARTHENOS will deliver guidelines, standards, methods, services and tools to be used by its partners and by all the research community.
