Minutes

- Vincenzo: please look at your information on the technology providers wiki and your products ID cards
- Joao: main focus on SL6 in UMD4, metapackages take lots of dependencies; all metapackages have yaim as dependencies
 - Vincenzo: to be discussed off line the strategy against the dependencies from legacy
- Zdenek: will we have voms-client on ubuntu?
 - Vincenzo to investigate with FedCloud if it is needed by the CMF, otherwise it won't be included
