# e-Infrastructure Commons monthly meeting Report for Accounting Portal

Iván Díaz

- Implemented NGI/Country/Site tree and navigation on new Accounting Portal, including context-sensitive hyperlinks.
- Implemented cloud view with supported metrics, NGI/Country navigation and direct linking from VMIds to AppDB database.
- Implemented SSL and added certificates to virtual servers.
- Tuned the database to allow more concurrent connections.

Accounting Portal Updates (II)

- Implemented new privileged view which unifies old VO Manager and Site Admin views into one.
- Added new combination possibilities to UserDN information, now displayed per any two of UserDN, User Role, Date, Site, Country, NGI, VO.
- Integrated view, now users which are both VO Managers and site Admins can see all data they have access to at once.
- Included support to super user which can see all info.

- Fixed storage view.
- Solved some problems with data synchronization.
- Deleted old entries from the cloud database to support INFN-BARI name change.
- Preparation of EGI Conference in Amsterdam.
- Preparation of WLCG meeting in CERN.

- Support for historic NGIs.
- Better OSG User reporting.
- Portal rewrite demo
- Portal rewrite tests.
