

Features Required from the Repository

Thursday, 4 March 2010 13:30 (1h 30m)

The Repository links the various actors in the EGI Middleware process

- * The contribution from the software providers
- * The verification of the releases by the MU
- * The rolling out into production of the software
- * The download of the software by sites
- * The use of the repository as a community driven contribution site (e.g. RESPECT)

The session will start with a presentation from GRNET with their view of the feature set and then expand into a broader discussion.

Presenter: LIABOTIS, Ioannis

Session Classification: Repository
