

EGI Operations Meeting Mar 13th, 2017 - Minutes

Participants

Vincenzo Spinoso (EGI)
Alessandro Paolini (EGI)
Bianca Neagu (NGI_RO)
David Crooks (NGI_UK)
George Ryall (STFC-GOCDB)
Jan Astalos (NGI_SK)
Kyriakos Gkinis (NGI_GRNET)
Stephane Gerard (NGI_NL)
Ulf Tigerstedt
Jerome Pansanel (NGI_FRANCE)
Ionut Vasile (NGI_RO)
Ruben Diaz (CESGA)
Bartosz Bosak
Andrzej Zemla (NGI_PL)

Minutes

- Jerome: What about CREAM for C7?
 - Vincenzo: there will be soon, they just missed the deadline for UMD4.4 so the aim is to have it on board for UMD 4.5 (May)
- David: any plan to have VO Nagios with ARGO?
 - Vincenzo: this is not going to happen very soon, probably next year; ask directly Emir for details
- Jerome: is Torque/MAUI to be supported in UMD4?
 - Vincenzo: MAUI is discontinued so very likely not to be included in UMD4

----- (03/13/2017 14:01) -----

Vincenzo Spinoso: <https://wiki.egi.eu/wiki/Agenda-13-03-2017>

----- (03/13/2017 14:05) -----

Jerome Pansanel (NGI_FR): hello everyone

----- (03/13/2017 14:20) -----

Ulf Tigerstedt (computer): dcache 3.0 is also now production ready

----- (03/13/2017 14:30) -----

David Crooks (NGI_UK): It's a bit noisy where I am to use a mic - the UK wanted to revisit (and revise) the discussion of a VO Nagios with ARGO given the approach of the end of March, in particular to check what other NGIs were doing.

David Crooks (NGI_UK): Yes, that's right

Jerome Pansanel (NGI_FR): I will give a talk in two weeks for LCG-France, where I will give a short presentation of supported CE by UMD-4.

Jerome Pansanel (NGI_FR): They are at least ARC CE, HTCondoer CE and CREAM CE

Jerome Pansanel (NGI_FR): Is there any other ?

David Crooks (NGI_UK): Sure

David Crooks (NGI_UK): OK - is there a good contact to keep in touch with on that?

David Crooks (NGI_UK): OK, thanks very much

Jerome Pansanel (NGI_FR): In addition, site admins would like to know if it is still safe to use torque/maui, as maui is no more really maintained

----- (03/13/2017 14:38) -----

David Crooks (NGI_UK): Cheers

Jan Astalos (NGI_SK): bye
