Peter Gille

### Records

- Ute trying to get robot certificates: NORDUGrid certification has not responded yet, with Terena it is not possible to specify the service name in the DN. Anders Wäänänen <[waananen@nbi.dk](mailto:waananen@nbi.dk)>
- Complete tests with OneData (Diego): Still open, still investigating, possibly related to the fact that there are many, many small files which makes VM suddenly stop. Ute had a chat last week with Matthew on this, too. Already workaround found to fix the issue, but looking for a better solution, should be available in the next days. No exact time scale.

- Enol's presentation: We still want to hear it in the whole group, even if Ute and Matthew already heard it. Otherwise it could be a good idea to have Enol talk about this topic in the form of a "regular" EGI presentation (organized separately to this meeting series).
- Documentation of Docker Swarm not up-to-date (Diego) doing Kubernetes documentation first, not that urgent. Agreed to wait until the better solution is available.
- ICOS internally working on communications between different VMs. This could have impacts on both orchestration and load balancing issues (should be discussed at our next ICOS meeting)
- Help to do B2STAGE transfer automatization: Ute hasn't contacted Peter yet, at the moment working on test set-up, Ute tested manually so far. Organise transfer from ICOS portal to B2STAGE first (there still iRODS is used),
- Peter and Maggie will be at the User Forum in Helsinki next week. Alex Vermeulen too. ICOS Session at Wednesday morning. Giuseppe Fiameni (WP7 lead) will also be there and give a talk.
- AAI coordination VC on January 20th 15:00-16:00 organised by Diego, what is the audience? Everyone invited to attend.
