# Outcome

- A good participation from the audience
  - That is not restricted only to INDIGO people!!
- Quite good feedback by both tech sessions:
  - Some interesting contacts with both users communities and tech institution interested in our works
- Intense and interesting tech chat @coffee and lunch break
- We experienced the usual difficulties in communicating the technical details about WP5 to a wide audience
  - Luckily we had quite enough time in the last session to discuss deeply few tech details

# Outcome

- Looking to the output of the “roadmap session” we need a discussion (Tech Board) together with the users communities to better schedule: priority and main goals...
  - I will send a doodle in the next days...
