

Accounting Repository Update

Adrian Coveney

WP3 Meeting – 2017-02-02

www.egi.eu

EGI-Engage is co-funded by the Horizon 2020 Framework Programme
of the European Union under grant number 654142

- D3.8 – First data set accounting prototype
 - External review
- D3.10 – Second release of the operational tools
 - Internal review
- D3.14 (was 3.13) – Report on data set accounting
 - Internal review

- Cloud Accounting
 - Writing up RFC on cloud schema v0.4 rollout for the new EGI change management process.
 - Some work required to add schema v0.4 fields to the Portal.
 - Next step is to revise the LRVM support.
- Data set usage accounting
 - Prototype tested against OneData.
 - Reports submitted.
 - Next step is improving the prototype and firming up the definition of data set accounting metrics.

- Storage accounting
 - Number of sites sending test records is steadily increasing. Would still like more.
 - Working on updated summaries to send to the Portal.
 - In discussions with two different storage systems at RAL with a view to add support for them.
 - Tracking WLCG developments in data management.
- Big data tools
 - Testing completed and report submitted. Would like feedback.

- GOCDDB paging
 - Have added support for this to APEL so that the list of APEL endpoints can still be retrieved successfully.
 - Not enforced at the moment, but APEL is now ready for when it is.
- ARGO Messaging Service
 - Started testing.
 - Seems to cover our requirements though need to scope the amount of development needed.

Thank you for your attention.
