e-Infrastructure Commons monthly meeting Report for Accounting Portal

Iván Díaz

- RT #11487: Add day,month,quarter,halfyear and year scaling to hour based units.
  - New control added, ignored when used with non-hour based metrics.
  - URL format was not changed, totally backwards compatible.
- Added geographic chart when countries are selected as row variable
  - Chart supports zooming and panning, countries can be selected and name is displayed.
  - Depending on the % of each country, different colors are assigned.
  - As with other graphs, clicking can enable and disable mouse capturing.

- REBUS Tier1 - Zero CPU manual metrics from REBUS
    - Manually input accounting for sites is not ignored as requested by WLCG.
- Remove spaces from CSV
- Switch Normalised CPU and Number of Jobs on landing page
- Removed Elapsed Time from landing page

Accounting Portal Updates (III)

- Fixed problems for some certificates not working correctly when accessing the user view
- Fixed ordering of percentages so that they are ordered numerically instead of alphabetically when on the rightmost column.
- First steps for the reimplementation of Storage view
  - Some cosmetics fixes need to be done in the view, but basic functionality works correctly.
  - Waiting to see if local summarizing needs to be maintained.

- Next release on April 2017.
- Work on the following release on July 2017.
- RT #9079 Support GPGPU Accounting
- RT #9078 Support Data Accounting
- RT #11421 Add country view and an option to get all T1 and T2 sites including OSG altogether
