- VAPOR
  - Enhance the historical script especially the 'JobMonitor' Tool
    - Monolithic tool
    - Not very efficient : 1 job ~ 1 JVM
  - Consolidation / coherency of the data :
    - Data issued from site publications with incoherencies
    - Detect and propose corrections
  - Extend the current features with user feedback

- Operations Portal
  - integration of complementary metrics for the VO
  - Add more genericity in the Vo Id cards
  - Extend the current features with user feedback
  - Adapt the current tools to the new communities
- New development
  - Define a new module for the SLA/OLA management including workflows to automatic service activations and on-demand generation of reports on resource usage.
