 - In the final step, presentation was shortened in consultation with Giuseppe La Rocca to reduce overlap. Also, the planned movie was excluded, due to time restrictions and reduced relevance considering the presentations.
 - Interest afterwards in what we are trying to achieve and even some requests for help from other communities. Hans hopes to get more concrete information from these people.
- André more concentrated on features within footprint tool. Next steps to test with several VMs. Currently still using NFS to share the files
- B2STAGE HTTP API has a first release candidate¹: Developers sent out an email couple of weeks ago. Testing at CINECA, also provided new documentation. Currently technical problem with getting people access outside of CINECA, needs expert still on vacation. Webinar on Monday at 11:00, originally only intended for developers, but opening up also for interested users. Paolo asked for a list of people to invited to this webinar - please e-mail Paolo directly if you are interested
