Panel discussion

Friday, 1 December 2017 14:25 (1h 5m)

A panel group consisting of key persons involved in designing and/or running related infrastructures will exchange ideas and views on the role OpenMinTeD can play in the Open Science paradigm. They are expected to bring in the discussion different perspectives, presenting how they see their collaboration with OpenMinTeD: for instance, if and how they could deploy OpenMinTeD for the objectives of their infrastructure, further requirements not yet addressed by OpenMinTeD, areas they can identify where their expertise or resources could be of benefit to OpenMinTeD. Topics to be discussed include but are not limited to: exchanging resources and sharing research results, working on and promoting common interoperability standards, raising awareness and training activities on TDM, Open Access, legal policies etc.
The audience will be asked to join in the discussion and offer their own insights.
Panelists:
Franciska de Jong (CLARIN),
Paolo Manghi (OpenAIRE),
Ron Dekker (CESSDA)

Session Classification: Text and data mining for open science
