

Plans for ELI Computing Infrastructure

Friday, 1 December 2017 11:10 (5 minutes)

Extreme Light Infrastructure project currently consists of 3 pillars in 3 countries and a coordination body ELI-DC.

The project will become European Research Infrastructure Consortium and will unify existing pillars. The common ICT

infrastructure is planned within a preparatory project ELITRANS, which includes also European e-Infrastructure organizations EGI.eu, EUDAT and PRACE. We will present our current ideas for user and data management and challenges

on the way for a unified computational environment.

Topic Area

Business models, sustainability and policies

Type of abstract

Presentation (15 minutes)

Primary author: CHUDoba, Jiri (CESNET)
