

Preservation of natural and cultural heritage: Herbadrop & Europeana case studies

Thursday, 30 November 2017 16:35 (15 minutes)

Herbadrop & Europeana communities have archived their collections of natural and cultural digital heritage onto a Trusted Digital Repository for long term archival on EUDAT CDI using B2SAFE. This repository offers a suitable Data Management Plan, including policies for managing the data life cycle. Herbadrop images have been processed using OCR techniques on HPC resources. Metadata have been crawled from the GBIF index in order to be made available using B2FIND service.

Presenter: PASCAL, Dugenie (CINES)

Session Classification: Massively distributed scientific corpora
