WP4 Federated Service Management

Tuesday, 9 January 2018 13:30 (1h 30m)

The session will include an overview of the workpackage, participating partners and funding and suggestions for logistics for managing the workpackage.

All task leaders will be given a slot to introduce their work, team members within each task and suggested milestones that will feed into the overall project workplan. Finally, there will be a discussion where other EOSC-hub workpackages will be identified which are likely to interact with WP4.

Presenter: VILJOEN, Matthew (EGI.eu)
