

INFRAEOSC-02-2019: Prototyping new innovative services for EOSC

Wednesday, 10 October 2018 09:15 (30 minutes)

The forthcoming call for proposals INFRAEOSC-02-2019 aims at designing and prototyping novel innovative digital services, that cover diverse aspects of the research data cycle, and will be accessible through the EOSC portal. The services will address current gaps in the offering, foster interdisciplinary research and serve the evolving needs not only of researchers but also of industry and the public sector. Consortia should consider innovative models of collaboration and incentive mechanisms for a user oriented open science approach. The participation of SMEs in the consortia is encouraged. The call will open on 16 October 2018, with deadline on 29 January 2019, and a total budget of 28.5 Meuro.
