Validating the Use Cases

Thursday, 12 May 2011 10:30 (1 hour)

Participating projects and user communities validate the EGI Cloud Architecture Use Cases by presenting overlap and disparity of their own use cases:
- Which project/community use cases fit well with the EGI Cloud Architecture Use Cases?
- Which project/community use cases do not fit in?
This is an open session where projects and communities can align their planned use of clouds to the 6 identified scenarios and where their planned use goes beyond these 6 scenarios.
